S.R.O. 10 of 2022

MONTSERRAT
STATUTORY RULES AND ORDERS
S.R.O. 10 OF 2022

TRADE IN ENDANGERED SPECIES REGULATIONS 2022

**THE TRADE IN ENDANGERED SPECIES REGULATIONS 2022
MADE BY THE GOVERNOR ACTING ON THE ADVICE OF
CABINET, UNDER SECTION 63 OF THE TRADE IN ENDANGERED
SPECIES ACT 2016 (NO. 10 OF 2016).**

PART 1—PRELIMINARY

1. Citation

These Regulations may be cited as the Trade in Endangered Species Regulations, 2022.

2. Commencement

These Regulations come into force on 31 January 2022.

3. Interpretation

In these Regulations—

“Act” means the Trade in Endangered Species Act 2016 (No. 10 of 2016).

PART 2—FORMS AND FEES

4. Form of application for permit or certificate

A person who wishes to trade in a specimen of an Appendix I, II or III species into or out of Montserrat for which a permit or certificate is required under the Act, shall apply to the Management Authority in the form prescribed in Schedule 1.

5. Form of permit or certificate

The Management Authority shall issue a permit or certificate with respect to an application under regulation 4, in the form prescribed in Schedule 2.

MONTSERRAT
Trade in Endangered Species Regulations, 2022
S.R.O. 10 of 2022

6. Form of identification card

The Minister shall issue an identification card to an authorised officer in the form prescribed in Schedule 3.

7. Fees

A person shall pay the relevant fee prescribed under Schedule 4 for—

- (a) an application under regulation 4; and
- (b) a service provided for under the Act or these regulations.

**PART 3—DETERMINATIONS RELATIVE TO APPLICATIONS
FOR PERMITS AND CERTIFICATES**

8. Determination of legal acquisition

In order to determine whether a specimen of an Appendix I, II, or III species was legally acquired, an applicant shall submit to the Management Authority sufficient information to satisfy the Management Authority that the specimen was obtained in accordance with the laws of Montserrat which provide for the protection of animals and plants.

9. Determination of non-detriment

The exportation or introduction from the sea of a specimen of an Appendix I or II species is not detrimental to the survival of the species and the importation of an Appendix I specimen is not detrimental to the survival of the species if the Scientific Authority is satisfied that—

- (a) biological and management information demonstrates that the proposed importation, exportation or introduction from the sea of the specimen provides for the sustainable use of the specimen;
- (b) the removal of the specimen from the wild is part of a biologically based sustainable use management plan designed to eliminate the overutilization of the species;
- (c) if no sustainable use management plan is established, the removal of the specimen from the wild will not contribute to the overutilization of the species;
- (d) the importation, exportation or introduction from the sea of the specimen—

MONTSERRAT
Trade in Endangered Species Regulations, 2022
S.R.O. 10 of 2022

- (i) will not lead to significant habitat or range loss or restriction;
- (ii) will not lead to a long-term decline that places the viability of the affected population of the species in question;
- (iii) in the case of a specimen of an Appendix II species, will not cause a risk that the species qualifies for inclusion in Appendix I; and
- (iv) in the case of a specimen of an Appendix I species, will not—
 - (A) cause an increased risk of extinction for the entire species or the population from which the specimen was obtained;
 - (B) interfere with the recovery of the species; or
 - (C) lead to a decline of the species if it stimulates additional trade in the species.

10. Determination of “primarily commercial purposes”

To determine whether the non-commercial aspects of an activity do not clearly predominate for the purposes of the definition of **“primarily commercial purposes”** under the Act, the Management Authority shall consider—

- (a) whether the importer is a for-profit entity, a non-profit entity or an individual;
- (b) the level of public appeal of the species;
- (c) the intended use of offspring;
- (d) the ability of the proposed uses of the specimen to generate revenue;
- (e) the occurrence of the species in a controlled environment in Montserrat; and
- (f) revenue and other economic value anticipated to result from the use of a specimen including—
 - (i) the proposed use of net profits generated in Montserrat;
 - (ii) the anticipated funding of a conservation project and if the specimen was or is to be taken from the wild, the way in which the conservation project benefits the species in its native range; and

MONTSERRAT
Trade in Endangered Species Regulations, 2022
S.R.O. 10 of 2022

(iii) plans to monitor a proposed conservation project.

11. Determination of suitability to house and care for live specimen

- (1) The recipient of a live specimen is suitably equipped to house and care for the specimen, if the appropriate Authority is satisfied that—
- (a) the enclosure or holding area for the specimen is adequate to prevent the escape of the specimen or an unplanned exchange of genetic material with specimens of the same or different species outside the enclosure or holding area;
 - (b) the recipient has security measures in place that are adequate to prevent the theft of the specimen;
 - (c) the recipient has a reasonable survival rate of specimens of the same species or closely related species having regard to—
 - (i) the number of births or plants propagated;
 - (ii) the morality of specimens for the previous three years, if applicable;
 - (iii) the occurrence of significant outbreaks of diseases that are permanently debilitating or recurring during the previous three years; and
 - (iv) the measures the recipient has taken to prevent similar mortalities, damage or outbreaks of diseases;
 - (d) the recipient has or will have sufficient funding to maintain—
 - (i) the specimen; and
 - (ii) the facility in which the specimen will be kept;
 - (e) in the case of a live animal—
 - (i) the recipient constructs and maintains an enclosure to provide sufficient space to allow the animal to make normal postural and social adjustments with adequate freedom of movement;
 - (ii) the recipient provides for the animal appropriate forms of environmental enrichment including nesting materials, perches, climbing apparatus, ground substrate or other species specific materials;

MONTSERRAT
Trade in Endangered Species Regulations, 2022
S.R.O. 10 of 2022

- (iii) if the animal is on public display, the recipient provides for an off-exhibit area, consisting of indoor and outdoor accommodation, as appropriate, that can house the animal for a long term if necessary;
 - (iv) the recipient provides adequate water and food that is appropriate for the species;
 - (v) the recipient and staff are trained and experienced in providing proper daily care and maintenance for the species or a closely related species;
 - (vi) the recipient has access to ready available veterinary care for the animal or veterinary staff experienced with the species or a closely related species; and
- (f) in the case of a live plant—
 - (i) the recipient provides sufficient space, appropriate lighting and other environmental conditions that will ensure proper growth and reproduction of the plant;
 - (ii) the recipient has the ability to provide appropriate culture for the plant including water, fertilizer and pest and disease control; and
 - (iii) recipient and staff are trained and experienced with handling the imported species or related species with similar horticultural requirements.
- (2) For the purposes of making a determination under subregulation (1), an applicant shall submit to the appropriate Authority sufficient information including—
 - (a) a description of the facility in which a specimen is to be kept accompanied by construction plans and photographs of the facility, if any; and
 - (b) the curriculum vitae of the recipient of the specimen.
- (3) If a person makes an application that requires the appropriate Authority to make a determination under subregulation (1) before the facility to keep the specimen is completed or staff is identified or properly trained, the appropriate Authority may—
 - (a) review all available information, including construction plans or intended staffing and make a determination based on this information; and

MONTSERRAT

Trade in Endangered Species Regulations, 2022

S.R.O. 10 of 2022

- (b) include a condition under the permit or certificate that the specimen may be imported or introduced from the sea only if—
 - (i) the facility under which the specimen is to be kept is completed; or
 - (ii) staff is adequately trained.
- (4) In this regulation, “**appropriate Authority**” means—
 - (a) in the case of the importation of a live specimen of an Appendix I species, the Scientific Authority; and
 - (b) in the case of the introduction from the sea of a live specimen of an Appendix I, II or III species, the Management Authority.

SCHEDULE 1

(Regulation 4)

**APPLICATION FOR A PERMIT TO EXPORT, RE-EXPORT,
IMPORT OR INTRODUCE SPECIMENS FROM THE SEA**

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED
SPECIES OF WILD FAUNA AND FLORA
MONTSERRAT

TRADE IN ENDANGERED SPECIES ACT 2016

Application for permit to export, re-export, import or introduce from the sea
specimens of animals or plants or derivatives of animals or plants

NOTES:

- An incomplete application will result in a delay in processing. If you need help please contact the Department of Environment.
- Print the information clearly. An illegible application may cause a delay in processing.
- After receipt of a complete application, processing may take up to 20 working days.
- The Trade in Endangered Species Act 2016 provides penalties for knowingly making a false or misleading statement in this application.
- In all cases original documents must accompany this application.
- **FOR DETAILED INSTRUCTIONS ON HOW TO FILL OUT THIS APPLICATION SEE SECTION H (INSTRUCTIONS)**

CHECKLIST

Permit to import

- ☐ Completed application.
- ☐ Application has been certified by person authorised to take statutory declaration.
- ☐ Fee (See Trade in Endangered Species Regulations 2022 for fee structure).

Permit to export or re-export

- ☐ Completed application.
- ☐ Application has been certified by person authorised to take statutory declaration.
- ☐ For re-exports, proof of legal import into Montserrat and/or legal export from country of origin.
- ☐ Fee (See Trade in Endangered Species Regulations 2022 for fee structure).

Pre-Convention certificate

- ☐ Completed application.
- ☐ Application has been certified by person authorised to take statutory declaration.
- ☐ Evidence of age of specimen e.g. copies of receipts, sworn affidavit, family will - please contact the Department of Environment for more details.
- ☐ Fee (See Trade in Endangered Species Regulations 2022 for fee structure).

MONTSERRAT

TRADE IN ENDANGERED SPECIES ACT 2016

SECTION H (INSTRUCTIONS):

Section A-Application type

1. Check whether the application is for a permit to import, export, re-export or introduce from the sea.
2. Indicate whether the specimen is considered "Pre-Convention." A Pre-Convention specimen is a specimen that was acquired before the species was included on CITIES. Please contact the Department of Environment for more information.

Section B-Name and address

Please fill in as much detail as possible for both the exporter/re-exporter and importer fields. For permits to import, the "Exporter" is an overseas name and address, and the Importer is a Montserrat name and address. For permits to export or re-export, the "Exporter" or "Re-exporter" is a Montserrat name and address and the "Importer" is an overseas name and address.

Section C-Purpose of Trade

Please indicate the purpose of trade. If you have any questions please contact the Department of Environment.

Section D-Shipment details

Please provide as much detail on the consignment as possible.

Section E-Specimen details

1. Scientific name: Please use the Latin name i.e. genus and species nomenclature.
2. Common name: As known in Montserrat or the country of export.
3. Description of specimen: Please provide as much detail as possible. For a live specimen, please fill in Section F also. Other information may include: export quota numbers, band number, scientific transfer exemption label number etc.
4. Quantity/unit/weight: Actual number, weight or volume.
5. CITIES Appendix: Appendix I, II or III. Please contact the Department Environment if you do not know this information.
6. Source:

W - Wild	C - Animals bred in captivity	R - From a ranching operation
U - Unknown (must be justified)	A - Plants that are artificially propagated	O - Pre-Convention

Please contact the Department of Environment if you require more information about this section.

7. If re-exporting: Complete this section if you intend to re-export a specimen that has previously been imported into Montserrat. Please attach proof of legal importation (e.g. Montserrat permit to import) or proof of legal export (e.g. export permit from country of origin).

Section F-Origin and legality

1. This section is to determine the source of the specimen with as much detail as possible.
2. Fill in Table 1 if the specimen came from the wild etc.
3. Fill in Table 2 if the specimen comes from captive breeding.
4. Fill in Table 3 if the origin of the specimen is unknown. Fill in to the best of your knowledge.

Section G-Declaration

1. Fill in your name, sign and date the declaration in the sections: "Name of applicant", "Signature of applicant", "Declared at", and "Date".
2. All application forms must be certified by a person authorised to take a statutory declaration.

Instructions and explanations

(These correspond to block numbers on the form)

1. Tick the square which corresponds to the type of document issued (export permit, re-export certificate, import permit or other). If the box "other" has been ticked, the type of document must be indicated. The original number is a unique number allocated to each document by the Management Authority.
2. For export permits and re-export certificates, the date of expiry of the document may not be more than six months after the date of issuance (one year for import permits).
3. **Complete** name and address of the importer.
- 3a. The name of the country must be written in full.
4. **Complete** name and address of the exporter/re-exporter. The name of the country must be stated. The absence of the signature of the applicant renders the permit or certificate invalid.
5. Special conditions may refer to national legislation or special conditions placed on the shipment by the issuing Management Authority. This block can also be used to justify the omission of certain information.
- 5a. The following codes should be used: **T** for commercial, **Z** for zoos, **G** for botanical gardens, **Q** for circuses and travelling exhibitions, **S** for scientific purposes, **H** for hunting trophies, **P** for personal, **M** for medical, **E** for education, **N** for reintroduction or introduction into the wild, and **B** for breeding in captivity or artificial propagation, **L** for law enforcement / judicial / forensic.
- 5b. Indicate the number of the security stamp affixed in block 13.
6. The name, address and country of the issuing Management Authority should already be printed on the form.
- 7-8. Indicate the scientific name (genus and species, where appropriate subspecies) of the animal or plant as it appears in the Convention Appendices or the reference lists approved by the Conference of the Parties, and the common name of the animal or plant as known in the country issuing the permit.
9. Describe, as precisely as possible, the specimens entering trade (live animals, skins, flanks, wallets, shoes, etc.). If a specimen is marked (tags, identifying marks, rings, etc.), whether or not this is required by a Resolution of the Conference of the Parties (specimens originating in a ranching operation, specimens subject to quotas approved by the Conference of the Parties, specimens of Appendix-I species bred in captivity for commercial purposes, etc.), indicate the number and type of mark. The sex and age of the live animals should be recorded, if possible.
10. Enter the number of the Appendix of the Convention (I, II or III) in which the species is listed.
Use the following codes to indicate the source:
W Specimens taken from the wild
R Specimens originating from a ranching operation
D Appendix I animals bred in captivity for commercial purposes and Appendix-I plants artificially propagated for commercial purposes, as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 4, of the Convention
A Plants that are artificially propagated in accordance with Resolution Conf. 11.11 (Rev. CoP14), paragraph a), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been propagated artificially for non-commercial purposes and specimens of species included in Appendices II and III)
C Animals bred in captivity in accordance with Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof, exported under the provisions of Article VII, paragraph 5 (specimens of species included in Appendix I that have been bred in captivity for non-commercial purposes and specimens of species included in Appendices II and III)
F Animals born in captivity (F1 or subsequent generations) that do not fulfil the definition of 'bred in captivity' in Resolution Conf. 10.16 (Rev.), as well as parts and derivatives thereof
U Source unknown (**must be justified**)
I Confiscated or seized specimens
O Pre-Convention (may be used with other source codes).
11. The quantity and units indicated should conform to the most recent version of the *Guidelines for the preparation and submission of CITES annual reports*.
- 11a. Indicate the total number of specimens exported in the current calendar year (1 January to 31 December) (including those covered by the present permit) and the current annual quota for the species concerned (for example 500/1000). This should be done for the national quotas as well as for those determined by the Conference of the Parties.
12. The country of origin is the country in which the specimens were taken from the wild, bred in captivity or artificially propagated, except in the case of plant specimens that cease to qualify for an exemption from the provisions of CITES. In such instances, the country of origin is deemed to be the country in which the specimens ceased to qualify for the exemption. Indicate the number of the permit or certificate of the exporting country and the date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-exports;
- 12a. The country of last re-export is the country from which the specimens were re-exported before entering the country in which the present document is issued. Enter the number of the re-export certificate of the country of last re-export and its date of issuance. If all or part of the information is not known, this should be justified in block 5. This block must only be completed in case of re-export of specimens previously re-exported.
- 12b. The "No. of the operation" is the number of the registered captive-breeding or artificial propagation operation. The "date of acquisition" is defined in Resolution Conf. 13.6 and is required only for pre-Convention specimens.
13. To be completed by the official who issues the permit. The name of the official must be written in full. The security stamp must be affixed in this block and must be cancelled by the signature of the issuing official and a stamp or seal. The seal, signature and security-stamp number should be clearly legible.
14. To be completed by the official who inspects the shipment at the time of export or re-export. Enter the quantities of specimens actually exported or re-exported. Strike out the unused blocks.
15. Enter the number of the bill of lading or air way-bill if the method of transport used requires the use of such a document.
The document must be written in one of the three working languages of the Convention (English, Spanish or French) or must include a full translation into one of these three languages. Exported and re-exported specimens should not appear on the same document unless it is clearly indicated which specimens are being exported and which re-exported.

AFTER USE THIS DOCUMENT MUST BE RETURNED TO A MANAGEMENT AUTHORITY OF THE IMPORTING COUNTRY.
